The global trend is toward increasing regulations around water to surface applications, with VGP compliance required in US waters and EU legislation pending. Added to that, responsible companies are investing in projects that promote stewardship and environmental sustainability. This means operators are looking for ways to achieve a ‘green’ operation without compromising on cost or quality.

**the solution**
Advances in marine technology mean that EAL products are outperforming or performing just as effectively as traditional lubricants. The Clarity® Synthetic EA range is developed with base oils that provide excellent oxidation and thermal stability, water separability and foam suppression while being fully biodegradable and future ready.

**premium performance**
Clarity Synthetic EA lubricants range provides outstanding protection with the advantage of meeting or exceeding regulatory requirements. Exceptional performance based on Chevron’s technical expertise powers the world forward and improves lives.

**high performance with low toxicity**
Chevron marine EA lubricants strike the perfect balance between excellent performance and low toxicity. The carbon derived base fluid (HEPR) in Clarity® Synthetic EA Hydraulic Oil and Clarity Synthetic EA Gear Oil is a powerful lubricant, formulated to deliver the benefits of traditional petroleum products with minimum environmental impact. Tests show that HEPR separates from water at the same rate as traditional petroleum lubricants. Clarity Synthetic EA Grease is a multipurpose thickened lubricating grease based on biodegradable esters. The combination of antioxidants, corrosion inhibitors, and EP/AW additives make this an ideal product for a variety of applications.

-48°C pour point of ISO 100 Clarity® Synthetic EA Hydraulic Oil, providing excellent fluidity in Arctic conditions

Chevron delivers future-ready EALs that meet or exceed legislative requirements.

Clarity marine EA lubricants are ashless, premium oils that help keep your stern tube seals and deck hydraulic systems operating longer than ash type oils.

- **Clarity® Synthetic EA Grease**
  - On deck applications
  - Lifeboat davit
  - Ester based
  - Corrosion inhibitor
  - Excellent adhesion and water resistance

- **Clarity® Synthetic EA Hydraulic Oils**
  - Hydraulic equipment: vane, piston, gear pumps
  - HEPR based
  - Low temperature pumpability
  - Non-sheening
  - Excellent water separability
  - Broad seal compatibility
  - Excellent oxidative stability

- **Clarity® Synthetic EA Gear Oil**
  - Gear applications in marine environments
  - HEPR based
  - Excellent water separability
  - Non-sheening
  - Broad seal compatibility
  - Excellent oxidative stability

Clarity marine EA lubricants for today

EALs recommended for use around the North and South Poles and are a requirement for vessels entering US waters.

Clarity EALs biodegrade by ≥60% in 28 days or less, minimizing impact on the environment.

- **reliable products that won’t let you down**
  - Exceptional performance based on Chevron’s technical expertise powers the world forward and improves lives.
