

# marine fuels

## chevron products supply & trading

**Chevron Marine Products, LLC** is committed to supplying the highest quality products with a strong focus on safety and service. Supported by our global refinery and logistics network, CMP provides an integrated, high-quality marine fuel offering.

### quality assurance

We supply high-quality ISO8217 (ver. 2010/2017) conventional and bio/renewable fuels to meet your specific technical and compliance needs.

### risk management

We offer a variety of pricing structures and risk management to accommodate customer needs.

### safety & environment

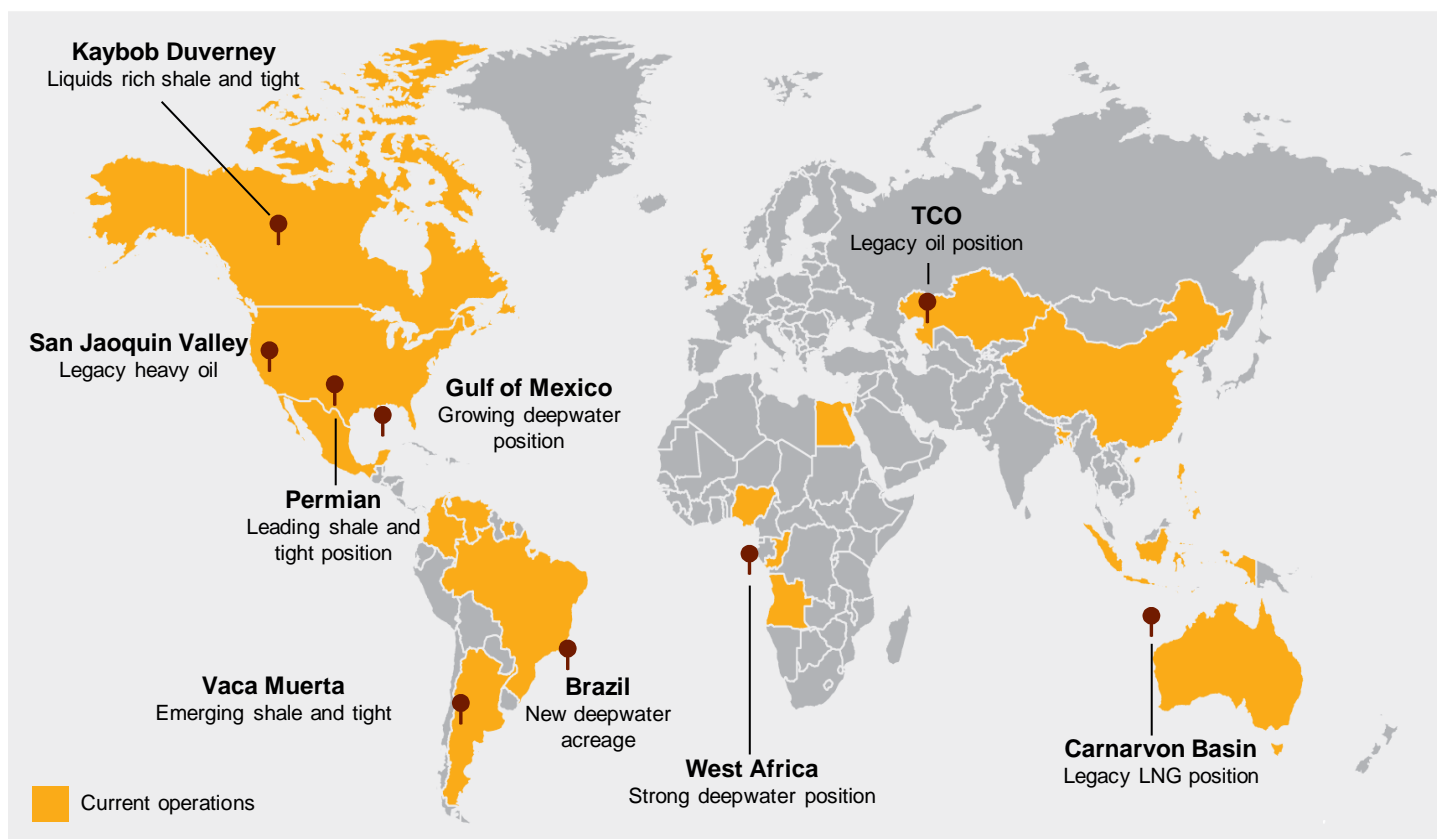

Our bunkering operations are driven by comprehensive Marine Assurance guidelines and a Safety-First approach.

### lower carbon

We provide solutions to meet your lower carbon goals. We offer biofuels bunkers at several ISCC-certified terminals globally. With Chevron Renewable Energy Group, we are expanding our marine fuel Renewable Diesel and Biodiesel production capacity. Other lower carbon solutions, including carbon insetting, are available to meet your enterprise objectives.

# crude

## chevron origination and commercial portfolio

## 1.4 MM bpd oil production

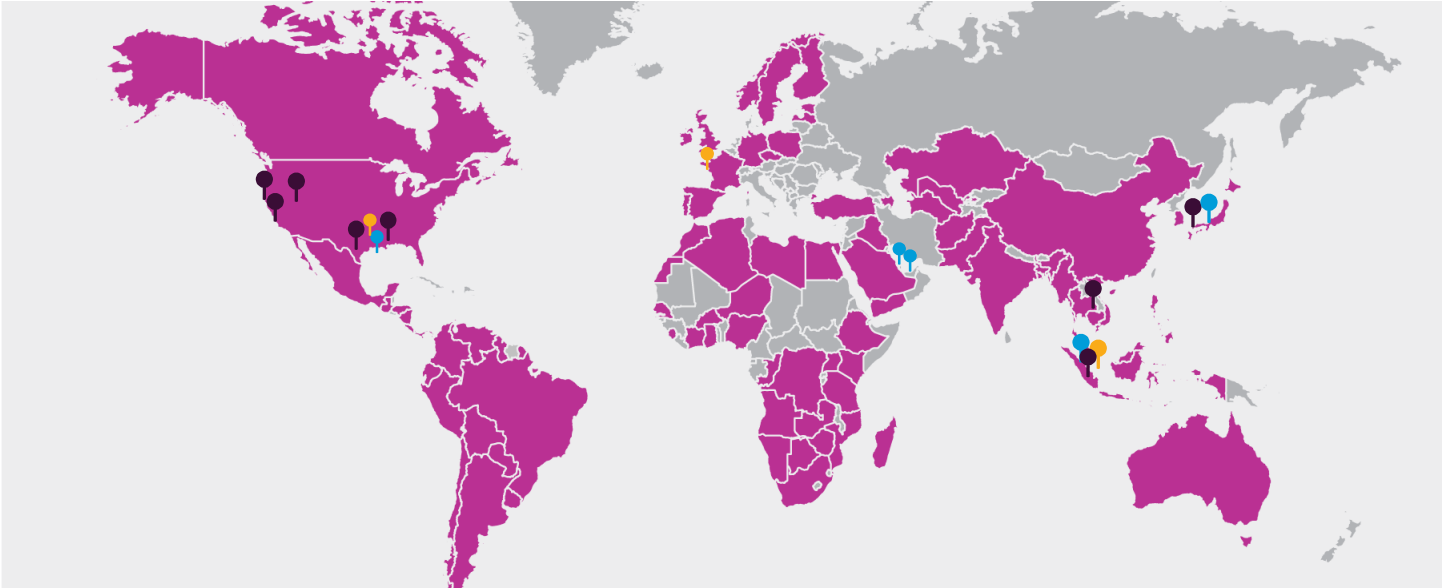

Crude and liquids production remains a **core focus area** for Chevron

### what we offer

- Access to a wide variety of crude slates
- An established presence in global trading hubs
- Global refining system provides flow assurance and international trust
- Robust shipping fleet means global trade dexterity

# refined products

chevron origination and commercial portfolio

Refinery Major petrochemical manufacturing facilities Major additive manufacturing facilities

1,779  
mbd

world class family of brands

- 2,614 mbd of refined product sales
- 13,776 branded retail sites
- 1,779 mbd of refining capacity
  - 8.4 MM tons chemicals sold
  - 67 proprietary terminals and lubricants blend plants
  - 40 bio refinery locations

trading team

### unique supply base

- MidCon production > 215 mbd
- International production > 55 mbd
- Supply from six USGC export docks

### supportive shipping strategy

- Six VLGCs and three SGCs on long-term time charter with dedicated shipping optimization support

### global trading program

- Global coverage allows support by teams in Asia, Europe and U.S.

1) 2021 Annual Supplement – NGL Production .

# liquefied natural gas (LNG)

## chevron origination and commercial portfolio

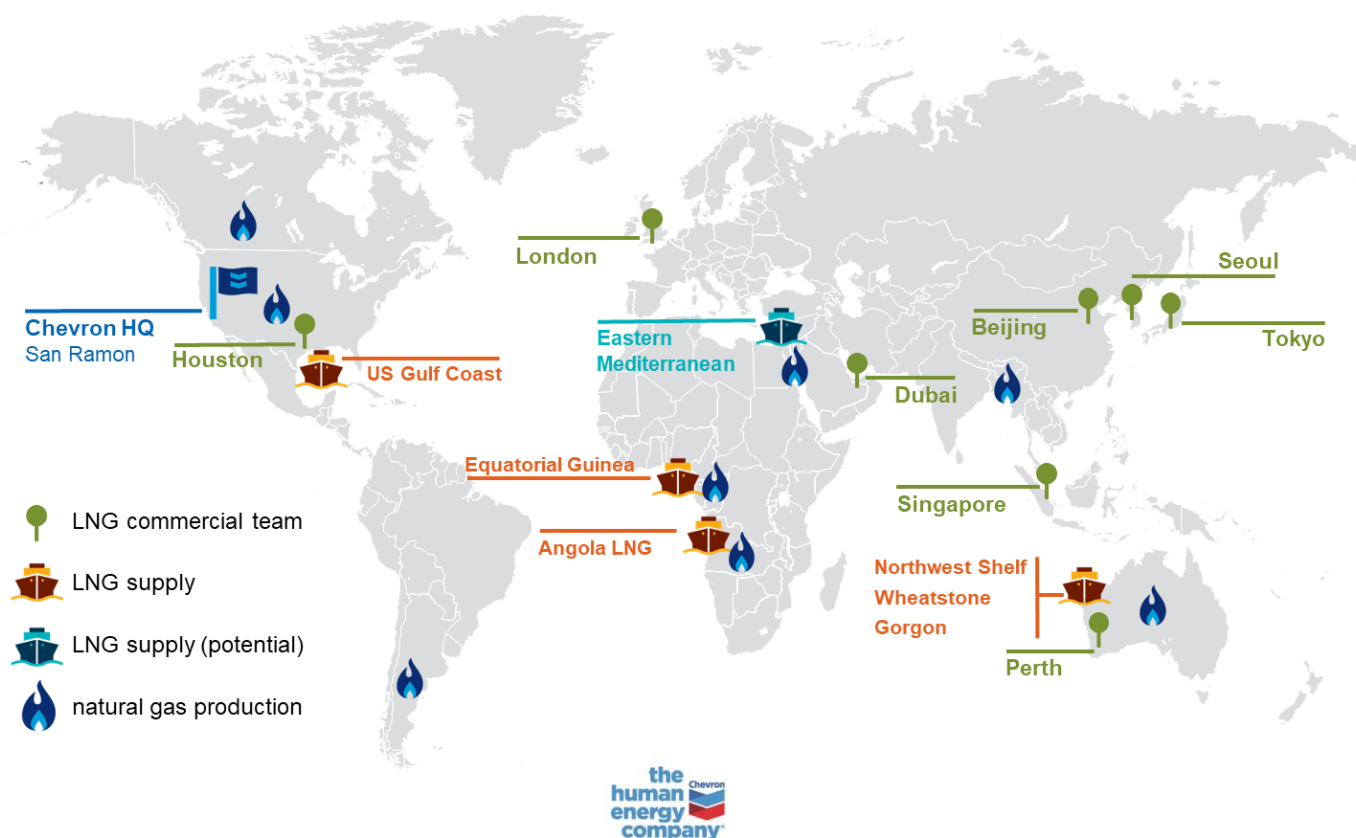

a globally connected portfolio with diverse, reliable supply

### global market presence

- Portfolio growing to 25+ MMtpa before end of decade
- Access to multiple Atlantic Basin and Pacific Basin LNG supply locations supported by a material shipping presence provides operational flexibility and reliability
- Strong reputation and relationships in all major energy markets established over 140+ year history
- Physical and financial management across all key price indices
- Peer-leading balance sheet
- Strong enterprise credit rating: S & P's AA-, Moody's Aa2

### lowering carbon

- Well-to-customer leadership in reducing carbon and methane intensity across the value chain
- A leader in the production of certified natural gas
- Operates the world's largest carbon capture and storage facility as part of our Gorgon LNG plant
- Shipping fleet with newbuild orders applying latest generation technology to reduce emissions
- Co-developed a statement of greenhouse gas emissions reporting methodology for application across our portfolio
- Ability to provide offset-paired LNG cargoes

# natural gas

## chevron origination and commercial portfolio

### connecting our natural gas resources on demand

#### natural gas production, storage, transport and sales

##### U.S. upstream

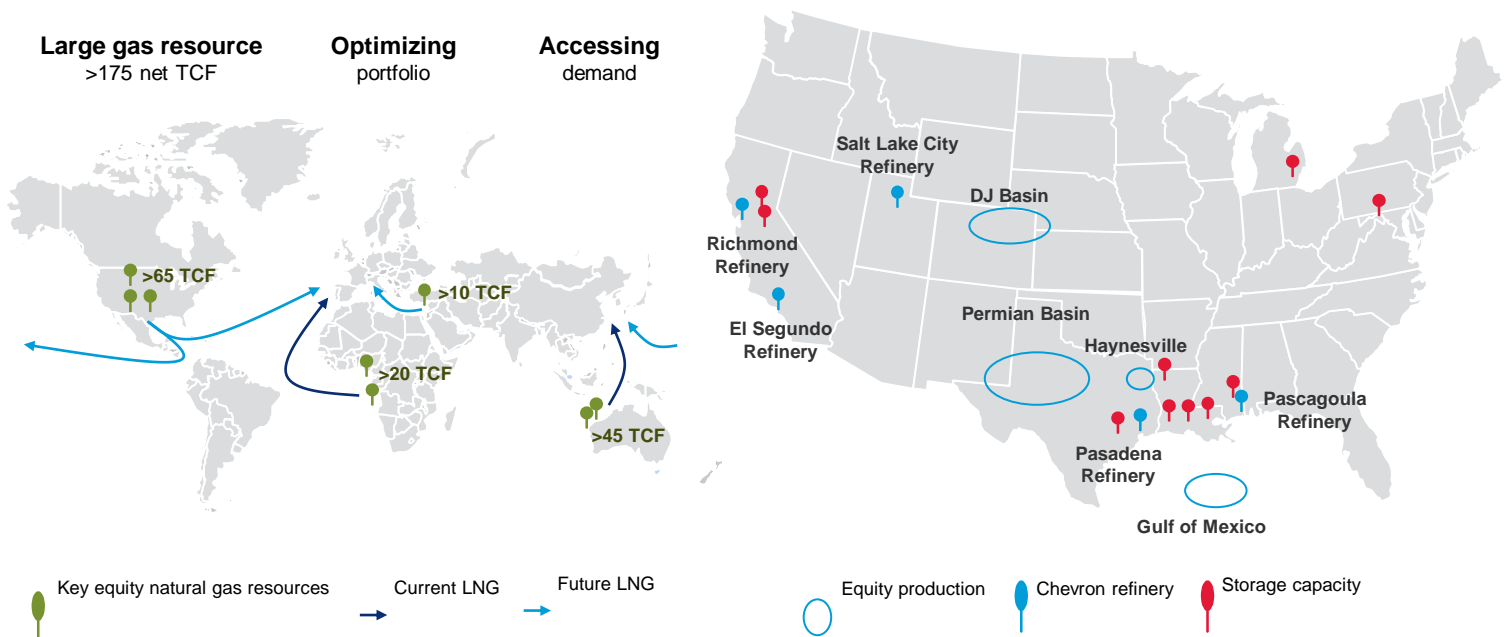

- Production: 1,800 MMcfd
- Storage: 20 Bcf
- Firm transport: 3.7 Bcf
- Sales: 4,400 MMcfd

##### International upstream

- 5,900 MMcfd

#### supply and trading capabilities

- Financial trading/hedging
- Fixed and index pricing
- Term sales agreement negotiation
- Origination
- Transport and storage agreements
- Pipeline commercial operations
- Market forecasting
- Storage optimization
- Certified gas trading

All resource figures are net unrisks source as of December 31, 2022.

# shipping

chevron origination and commercial portfolio

**~100**

controlled vessels  
in the fleet

**sizable  
vessel fleet**

Aimed at safely and  
reliably transporting our  
commodities to meet the  
needs of the global  
economy

**1**

billion barrels  
transported annually

**supportive shipping  
strategy**

Efficient transport with lower  
carbon emission strategies

**3**

commercial  
shipping offices

**global  
presence**

Commercial offices in  
Houston, London and  
Singapore
